

CABLE MANAGEMENT WITH STYLE

As part of a constant effort to always meet the needs of users, Cooler Master presents the Colored Extension Cable Kit. This set of universal cable extensions is an upgraded version of an already great product. For starters, this kit offers an additional 8 Pin CPU cable to account for higher end motherboards. The 6 Pin PCI-e extensions have been converted to 6+2 Pin connectors for higher end graphics cards. This will save time and money for higher end builds. The outer layer of the cables has also been replaced with PVC, one of the most trusted cable sleeving materials available.

FEATURES

30cm Cable Length : Extension cables are long enough to conceal factory PSU cables in most standard ATX cases.

16AWG Wire Type : Cables are thicker than standard industry cables for better durability, improved heat resistance, and increased current stability.

PVC Slewing : The outer layer of the cables is PVC colored sleeving, ensuring durability, a high quality appearance, and flexibility all at the same time.

Universal Connectors : Extension cables will work with any PSU on the market that uses industry standard connectors: ATX 24 Pin, CPU 4+4 Pin, CPU 8 Pin, PCIe 6+2 Pin, PCIe 8 Pin.

Multiple Color Options : The Colored Extension Cable Kit is available in black, white, white/black, red/black, blue/black, and green/black.

Full High-End System Cable Options : The Colored Extension Cable Kit offers enough extension cables to fully support a 16 EPS pin motherboard and two 16 pin GPU build.
